### Short biography outlining your interest and experience in Adaptive Snow Sports

I have been involved with adaptive snowsports for the last 9 years.

This has mainly involved coaching a wide variety of snowboard athletes from introductory level to elite. I have also participated in volunteer coaching days.

Among other factors I have also, been involved in planning adaptive festivals, on the snowboard side.

Adaptive sport has always a passion of mine to be involved in as I enjoy the camaraderie it brings, along with the enjoyment and inclusivity that everyone involved experiences.

I am particularly interested in guiding adaptive snowboarding through some good strategic thinking and collaboratively working with all involved to be able to give quality experiences and opportunities for future participants and competitors.

**What skills and expertise do you believe you can bring to the Adaptive Committee?**

I am an accomplished sport development professional specialising in system building and creating great experiences.

I am a pragmatic, clear thinking problem solver, strategist and leader. I have learnt that having a big picture approach allows me to take on multiple tasks and work through them while not losing sight of the common goal. I work hard to ensure that every experience for all people is of a high quality.
